

# Custom Plastics International Ltd.

Plastic Injection Molding Professionals since 1965

# Specializing In: Highly Engineered Products Metal Replacements Cosmetic Parts Assemblies

CPI is a privately owned custom injection molder of commodity and highly engineered thermoplastics that was founded in 1965.

- Automated injection molding machinery ranging in size from 35 - 500 ton
- ISO9001:2000 certified
- Professional engineering resource with vast experience to handle projects from prototype to production

- Low cost alternative to off-shore molding
- Real Time ERP system
- Simple to complex assembly
- Insert molding
- Over-molding
- Pad printing, silk screening, and painting
- Plating & EMI Shielding
- Heat-staking & ultrasonic welding
- Robot-controlled adhesive bonding
- Kit and customer end use packaging

**“Custom Plastics is a world class injection molding company located in Cobourg, Ontario. Customer service, timely delivery, a keen appreciation for cost and a high quality standard make CPI an excellent partner for plastic parts. When comparing with plastics injection molders worldwide, CPI remains a the top of their game in this highly competitive market.”**

Nestor Baryliuk  
Director of Special Projects  
Christie Digital Systems Inc.

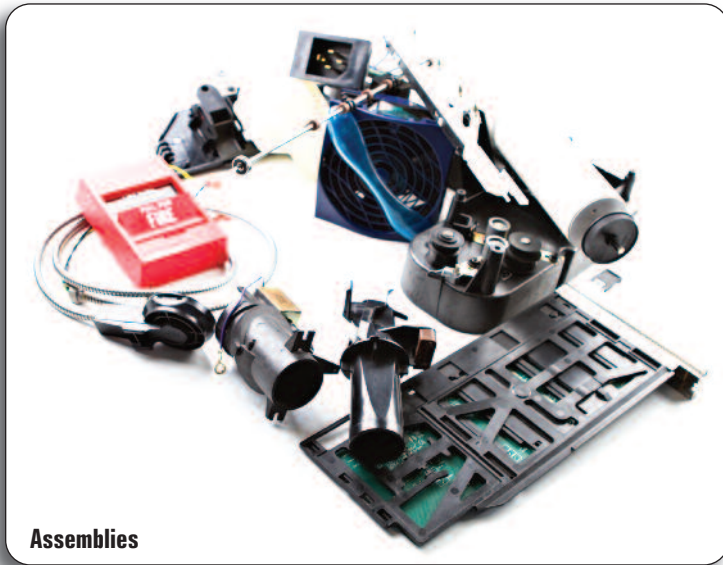

**“As our primary supplier of plastic injection moulded products for the last 12 years, CPI has been integral in keeping TrojanUV competitive from the perspective of both value and design. Their engineering and customer support are exemplary.”**

Randy Hail, C.P.P.  
Director of Global Procurement  
Trojan UV

## What sets CPI apart from the others?

- **Service, Service, Service...** we understand that you own the tooling and are looking for a competent supplier to provide you with high quality parts on time at a good price.

- Privately owned non-union shop.
- We own our building and machinery. No risk that we are not going to be here tomorrow.
- Over 40 years experience in highly engineered plastic products. No Flower Pots here.
- Real time enterprise resource planning that drives our systems driven experienced staff... our systems save you \$\$.

**Time to market...**with our internal APQP system and solid business relationships with Chinese and Local tool-shops we are able to turn around projects from concept to production in mere weeks.

**Examples of projects we took from concept stage to full production in 4 weeks.**

## Let Team CPI take plastics out of your supply chain issues

**"Big company skills and processes but small company efficiency and attention to details."**

Michael Hotchkiss
